

Communication

Date	02 July 2026
Team ID	
Project Name	Rising Waters-ML Flood Prediction System
Maximum Marks	1 Mark

Communication Plan

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Project Planning	Day 1	VS Code, GitHub & WhatsApp	Gayatri Botcha, A Geetha Sree	Plan project tasks and development schedule.
2	Progress Review	Daily	VS Code, GitHub & WhatsApp/In-person Discussion	Gayatri Botcha	Track completed tasks and plan the next steps.
3	Technical Support	As Needed	ChatGPT, Official Documentation & Google Search	Gayatri Botcha, A Geetha Sree	Resolve coding and machine learning issues.
4	Documentation	Daily	Google Docs	A Geetha Sree	Prepare project reports and required templates.
5	Final Demo Preparation	Once	VS Code & PowerPoint	Gayatri Botcha, A Geetha Sree	Prepare and rehearse the final project demonstration.

Communication Challenges & Resolutions

S.No	Challenge Faced	Resolution / Action Taken
1	Finding a suitable flood prediction dataset.	Collected an open-source dataset from Kaggle.
2	Integrating the trained XGBoost model with the Flask application.	Referred to Flask, Scikit-learn and XGBoost documentation and tested the integration step by step.
3	Completing the project documentation in a short time.	Planned daily tasks and completed each template systematically.
4	Deploying the application on Render and resolving deployment issues.	Configured the required files (requirements.txt, Procfile, Unicorn), connected the GitHub repository, and verified successful deployment on Render.
