

Demonstration of Proposed Features

Date	02 July 2026
Team ID	
Project Name	Rising Waters-ML Flood Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features

S.No	Feature Name	Description	Status (Implemented/Partial/ Pending)	Demonstrated (Yes/No)	Remarks
1	User Input Form	Allows users to enter rainfall and weather data.	Implemented	Yes	Working successfully .
2	Data Preprocessing	Cleans and prepares the input data before prediction.	Implemented	Yes	Model accepts processed data correctly.
3	Flood Prediction Model	Flood Prediction Model – Predicts flood risk using the trained XGBoost classification model.	Implemented	Yes	Produces accurate prediction results.
4	Prediction Result Page	Displays flood risk result (Flood / No Flood) along with probability values.	Implemented	Yes	Results are displayed correctly.
5	Flask Web Application	Provides a web interface for users.	Implemented	Yes	Application runs successfully .
6	Model Deployment	Model Integration & Deployment – Loads the saved XGBoost model (Joblib) and uses it for real-time predictions in the Flask application.	Implemented	Yes	Model is loaded and used successfully .

Feature Implementation Summary

Metric	Value
Total Features Proposed	6
Total Features Implemented	6

Total Features Demonstrated	6
Overall Implementation Rate (%)	100%(All core features successfully implemented and tested)
