

Project Initialization and Planning Phase

Date	27 June 2026
Team ID	
Project Name	Rising Waters-ML Flood Prediction System
Maximum Marks	3 Marks

Problem Statements (Customer Problem Statements)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A resident living in a flood-prone area.	Know the possibility of flood occurrence based on weather and rainfall conditions	I do not have an easy tool to predict flood risk.	There is no easy way to predict floods.	Worried about my family's safety.
PS-2	A disaster management officer.	Analyze weather data and predict flood risk.	It is difficult to process large amounts of rainfall and weather data manually.	There is a lot of rainfall data to check.	Concerned about protecting people.
PS-3	A local government officer.	Support flood risk assessment and disaster preparedness.	Existing prediction methods may require complex analysis and resources.	Current methods are slow and less reliable.	Responsible for public safety.
